

# SPANTREAT B2005

## OXYGEN SCAVENGER

SPANTREAT – B2005 is a catalyzed oxygen scavenger in liquid form. It is recommended for the rapid and complete removal of dissolved oxygen from boiler feed water.

### ADVANTAGES

#### Rapid reaction

The catalyst in SPANTREAT – B2005 leads to rapid removal of dissolved oxygen. This removal is possible even in cold water. Dosage is done in boiler feed water system and can be either slug dosed or through a dosing pump.

#### Easy to Handle

SPANTREAT – B2005 is a liquid having the consistency of water. As the formulation is water based it is soluble in water even at lower feed water temperature. It is not toxic or corrosive.

#### Dosages

Usual dosages are at 30-40 ppm however exact dosages will be suggested by your service and sales representative.

### PACKING

SPANTREAT – B2005 is available in 35 liter Cans.
